Application No. 10/721,735 Amendment dated August 25, 2006 In Response to non-final Office Action mailed May 25, 2006 Page 2 of 12

Amendment to the Claims

This listing of Claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims

(Currently Amended) An LCD device <u>having a direct-type backlight</u>
comprising:

an LCD panel for displaying an image;

- a plurality of fluorescent lamps <u>disposed below the LCD panel at fixed</u> intervals in an area substantially corresponding to the LCD panel;
- a heat protection plate formed between the LCD panel and the plurality of fluorescent lamps;
- a first open area is disposed between the heat protection plate and the $\ensuremath{\mathsf{LCD}}$ panel; and
- an <u>a</u> unitary case supporting the plurality of fluorescent lamps <u>disposed</u> below the LCD panel at fixed intervals in the area substantially corresponding to the <u>LCD panel</u> and the heat protection plate, wherein the heat protection plate is disposed in the case.
- (Original) The LCD device of claim 1, wherein the heat protection plate comprises at least one of a diffusion plate and an optical sheet.

Application No. 10/721,735 Amendment dated August 25, 2006 In Response to non-final Office Action mailed May 25, 2006 Page 3 of 12

- (Original) The LCD device of claim 1, wherein the heat protection plate comprises a light transmitting plate.
- (Original) The LCD device of claim 1, further comprising a reflecting plate disposed to reflect light from the fluorescent lamps to the LCD panel.
 - (Cancelled)
- (Previously presented) The LCD device of claim 4, wherein the reflecting plate is formed on the case.
- (Original) The LCD device of claim 4, wherein the reflecting plate comprises a high optical reflectivity material comprising at least one of silver, titanium and a polymer.
- (Previously presented) The LCD device of claim 1, wherein the case comprises a high heat conductivity material.

Application No. 10/721,735

Amendment dated August 25, 2006

In Response to non-final Office Action mailed May 25, 2006

Page 4 of 12

9. (Original) The LCD device of claim 8, wherein the high heat

conductivity material comprises at least one of aluminum and an aluminum alloy.

10. (Original) The LCD device of claim 1, further comprising a second

open area disposed between the heat protection plate and the plurality of fluorescent

lamps.

11. (Original) The LCD device of claim 10, wherein the heat protection

plate further comprises a plurality of heat protection panels, and a third open area is

disposed between at least one pair of the plurality of heat protection panels.

12. (Original) The LCD device of claim 11, wherein the third open area is

disposed between each pair of the plurality of heat protection panels.

13. (Original) The LCD device of claim 11, wherein the third open area is

disposed between each pair of the plurality of heat protection panels.

14. (Original) An LCD device according to claim 12, wherein at least one

of the plurality of heat protection panels comprises a light transmitting plate.

Application No. 10/721,735 Amendment dated August 25, 2006 In Response to non-final Office Action mailed May 25, 2006 Page 5 of 12

15. (Currently Amended) An LCD device <u>having a direct-type backlight</u> comprising:

an LCD panel displaying an image;

a plurality of fluorescent lamps <u>disposed below the LCD panel at fixed</u> intervals in an area substantially corresponding to the LCD panel;

 $\label{eq:means} \mbox{means for scattering light disposed between the LCD panel and the}$ plurality of fluorescent lamps;

means for reflecting light toward the LCD panel;

a first open area disposed between the light scattering means and a rear surface of the LCD panel; and,

an a unitary case for supporting the plurality of florescent lamps disposed below the LCD panel at fixed intervals in the area substantially corresponding to the LCD panel, the light-scattering means and the light reflecting means.

 (Original) The LCD device of claim 15, wherein the light-scattering means comprises at least one of a diffusion plate and an optical sheet. Application No. 10/721,735 Amendment dated August 25, 2006 In Response to non-final Office Action mailed May 25, 2006 Page 6 of 12

- (Original) The LCD device of claim 15, wherein the light-reflecting means comprises a high optical reflectivity material coated on a high heat conductivity material.
- (Original) The LCD device of claim 17, wherein the high optical reflectivity material comprises at least one of silver, titanium and a polymer.
- (Original) The LCD device of claim 15, wherein the case comprises a high heat conductivity material.
- (Original) the LCD device of claim 19, wherein the high heat conductivity material comprises at least one of aluminum and an aluminum alloy.
- (Original) The LCD device of claim 15, further comprising a second open area disposed between the light-scattering means and the plurality of fluorescent lamps.

Application No. 10/721,735 Amendment dated August 25, 2006 In Response to non-final Office Action mailed May 25, 2006 Page 7 of 12

- (Currently Amended) An LCD device <u>having a direct-type backlight</u> comprising;
 - an LCD panel for displaying an image;
- a plurality of fluorescent lamps <u>disposed below the LCD panel at fixed</u> intervals in an area substantially corresponding to the LCD panel;
- a first diffusion plate and a first optical sheet attached to the LCD panel such that the first diffusion plate and the first optical sheet are disposed between the LCD panel and the plurality of fluorescent lamps disposed below the LCD panel at fixed intervals in the area substantially corresponding to the LCD panel;
- a heat protection plate disposed between the LCD panel and the plurality of fluorescent lamps;
- an a unitary case for-supporting the plurality of fluorescent lamps

 disposed below the LCD panel at fixed intervals in the area substantially

 corresponding to the LCD panel, the heat protection plate, wherein the heat protection

 plate is disposed in the case; and
- a first open area disposed between the heat protection plate and the LCD panel.

Application No. 10/721,735

Amendment dated August 25, 2006

In Response to non-final Office Action mailed May 25, 2006

Page 8 of 12

 (Original) The LCD device according to claim 22, wherein the heat protection plate comprises at least one of a second diffusion plate and a second optical

sheet.

24. (Original) The LCD device according to claim 22, wherein the heat

protection plate comprises a light transmitting plate.

25. (Original) The LCD device of claim 22, further comprising a reflecting

plate disposed to reflect light from the fluorescent lamps to the LCD panel.

26 (Original) The LCD device of claim 25, wherein the reflecting plate

comprises a high optical reflectivity material containing at least one of silver, titanium

and a polymer.

27. (Cancelled)

28. (Previously amended) The LCD device of claim 25, wherein the

reflecting plate is formed on the case.

Application No. 10/721,735 Amendment dated August 25, 2006 In Response to non-final Office Action mailed May 25, 2006 Page 9 of 12

- (Previously amended) The LCD device of claim 22, wherein the case comprises high heat conductivity material.
- (Original) The LCD device of claim 29, wherein the high heat conductivity material comprises at least one of aluminum and an aluminum alloy.
- (Original) The LCD device of claim 22, wherein a second open area is disposed between the heat protection plate and the fluorescent lamps.
- 32. (Original) The LCD device of claim 22, wherein the heat protection plate comprises a plurality of heat protection panels, and a third open area is disposed between at least one pair of the plurality of heat protection panels.
- (Original) The LCD device of claim 32, wherein the third open area is disposed between each pair of the plurality of heat protection panels.
- 34. (Original) The LCD device of claim 32, wherein at least one of the plurality of heat protection panels comprises at least one of a diffusion plate and an optical sheet.

Application No. 10/721,735 Amendment dated August 25, 2006 In Response to non-final Office Action mailed May 25, 2006 Page 10 of 12

- 35. (Original) The LCD device of claim 32, wherein at least one of the plurality of heat protection panels comprises a light transmitting plate.
- 36. (Previously presented) The LCD device of claim 1, wherein the heat protection plate is connected to the case.
- (Previously presented) The LCD device of claim 15, wherein the lightscattering means is connected to the case.
- 38. (Previously presented) The LCD device of claim 22, wherein the heat protection plate is connected to the case.
